

### Example: Markup a right angle

```

1 \begin{tikzpicture}
2   \draw (20:1cm) coordinate (A) -- (0, 0) coordinate (O) --
   ↪ (110:1cm) coordinate (B)
   pic [draw, pic text=$\beta$, angle radius=5pt, angle
   ↪ eccentricity=.8] {right angle = A--O--B};
4 \end{tikzpicture}

```

angle radius = \i, angle eccentricity = \j
