

Example 2: Use multiple fonts for math formulae

```
1 %\usepackage{unicode-math}
2 %\setmathfont{Latin Modern Math}
  %\setmathfont{SourceHanSerif-Heavy}[range="002C]
4
  \LARGE
6 text mode: abc, def, xyz, 123 \par
  math mode: $(1,1) + (x, y)$ and $i = 1, 2, \dots, n$
```

text mode: abc, def, xyz, 123

math mode: $(1,1) + (x,y)$ and $i = 1, 2, \dots, n$
