Example 1: `menukeys` - demos

```latex
% \usepackage{menukeys}

% change style
\renewmenumacro\directory[/]{pathswithfolder}

\newcommand\toCmd[1]{\texttt{\textbackslash #1}}
\begin{tabular}{rl}
      \toCmd{menu} & \menu{Extras > Settings > Rulers}       \\
      \toCmd{keys} & \keys{cmd + R}                          \\
   \toCmd{directory} & \directory{/Users/Your Name/Documents}
\end{tabular}
```

\menu	[Extras] [Settings] [Rulers]
\keys	[cmd]+[R]
\directory	Users ▸ Your Name ▸ Documents

Example 2: `menukeys` - new command \stackedKeys

```latex
% \usepackage{menukeys}

\stackedKeys{<\\, + >\\. + \&\\7 + \~{}\\\texttt{`}} vs
\keys       {<     + >    + \&    + `~{}}
```

[<][,] + [>][.] + [&][7] + [~] vs [<] + [>] + [&] + [`]
