Example: Nested tables

```latex
1  \newcommand{\innerTable}{
2    % "@{}" inserts zero colume sep
     \multicolumn{1}{|@{}c@{}|}{
4      % to exactly touch the outer table, inner table, as a cell of
       % the outer, should be the widest/highest cell of column/row
6      \begin{tabular}{c|c}
         a & content \\ \hline b & b
8      \end{tabular}
     }
10 }

12 \begin{tabular}{|c|c|}
     \hline
14   content & content      \\ \hline
     content & \innerTable \\ \hline
16 \end{tabular}
```

content	content	
content	a	content
	b	b
